INTRODUCTION

UKMeta Token is a prominent player in the Metaverse cryptocurrency realm, residing on the Binance Blockchain and adhering to the BEP-20 standard. This forward-thinking digital asset sets itself apart with a finite supply of 25cr units and a standout feature: cross-chain compatibility. Its core focus revolves around fortifying transactional security within the Binance Smart Chain-based Blockchain system.

Dedicated to the principles of open-source decentralization, UKMeta Token employs a proof of stake consensus mechanism. This meticulous design prioritizes decentralization, scalability, and user transactional privacy. UKMeta Token has fostered a thriving ecosystem, encompassing a Launchpad, Swap Exchange, DeFi infrastructure, NFT Marketplace, Gamefi, Exchange, and other essential components. These elements synergize to enhance the UKMeta Token Network's efficiency and functionality, with UKMeta Token acting as its linchpin.

In essence, UKMeta Token is a Metaverse cryptocurrency that embodies innovation and security. It thrives in an ecosystem carefully crafted to empower its users and shape the future of the Metaverse. With cross-chain compatibility, robust security, and an array of interconnected services, UKMeta Token stands as a beacon in the ever-expanding world of digital assets, poised to lead the way in Metaverse evolution.

MISSION

- To try on unlocking UKMeta Token potential and making UKMeta Token easy to use.
- To make UKMeta Token market place with global reach. To provide attention to the financial profits and safety of every single stakeholder.
- To facilitate the ability of buyer-seller to transact a wallet in the most secure way.

VISION

- To create a global UKMeta Token marketplace where buyers and sellers can buy, sell and trade UKMeta Token in most secured and trusted manner.
- To solve current problems of customers in a manner that make their business easier.

**VISION &
MISSION**

CORE VALUES

Be Magical. We are positive and kind above all else. Our main goal is to create happiness in other lives. Be Charitable We strive to be as giving as we can possibly be, helping out our community as much as we can. Be Sustainable We make decisions that are based on our long term health, not the short term gain. Be Transparent We strive to be open and honest with our community at all times, for the benefit of all.

ECOSYSTEM

UKMeta Token is a company that aims to bring innovation and novelty to the gaming, defi, utilities, nft, sports, forex and crypto trading sector through its Blockchain technology. The ecosystem of UKMeta Token is very vast and broader as it is embedded with BSC that makes it more essential for the people associated with the agriculture and food sector.

BINANCE BLOCKCHAIN TECHNOLOGY

A decentralized open-source Blockchain-based operating system with smart contract capability, proof-of-stake principles for its consensus process, and a cryptocurrency unique to the system, known as Binance is a decentralized, open-source Blockchain-based operating system (BSC).

WORKING OF BINANCE SMART CHAIN

Binance is founded on a few essential concepts, the most important of which is decentralization. All data on the Blockchain is completely unfettered and is not under the jurisdiction of a central authority. Content creators can receive Binance in return for sharing their work. Additionally, developers can create their own Tokens on the Binance network. These tokens can then be used in the network's user created decentralized apps (dApps). Binance main token is used to back the newly issued tokens. The network's ultimate step of development is to support Binance based games. These games would be totally decentralized, with users rewarding authors directly if they enjoyed the game. Binance's consensus algorithm is referred to as delegated proof-of stake. In this system, transactions are authenticated by 27 super representatives who are responsible for keeping the transaction history. Super representatives are picked every six hours and compensated with a Binance Token created by the system. Every three seconds, a new block is added to the Binance Blockchain.

BENEFITS OF BINANCE BLOCKCHAIN

Transactions on the Binance Blockchain technology at Very Less Cost. Binance does not impose a fee for asset transfers. It assists sellers and buyers through its free transactions, promotes, and provides the optimal business environment. Rapid transactions The network can handle up to 2000 transactions per second. Scalability and the potential to revolutionize online media are encouraged by such transactional capacity.

This is a major accomplishment compared to Ethereum (25 transactions) or BitToken (3-6 transactions). Creates dApps On the network, you can create dApps. You can earn digital assets by creating a dApp on the network and offering content on it. These can be in regular Binance you created Binance backs that. As a result, you may be compensated for your efforts in developing the app and its content. If you don't want to create your own dApps, you can still browse through the vast collection already created.

SUPPORTS CREATORS

Binance believes it is essential to support content owners more effectively, and a network is an amazing option. If you're a 2024 internet user, chances are you enjoy having to read digital content. Because content creators enable you to be happy while watching, it is only fair that they are compensated fairly for their efforts

ANONYMOUS TRANSACTION

Transactions on the Binance network are anonymous, but only on the network itself. The act of purchasing BNB and the requirement of using an exchange means that you will have to prove your identity to purchase Binance tokens in the first place. Transactions can, however, be carried out anonymously once on the network. On the other hand, it should be noted that all Blockchain keep a record of all transactions that take place on the chain. As a result, no transaction can ever be truly anonymous.

SAFE

UKMeta Token has a solid reputation in the cryptocurrency world. The amount of money spent by the company on security and the personnel it has hired demonstrates this. As with other cryptocurrencies, because it is a decentralized network, the individual bears a significant responsibility for safeguarding their tokens. In terms of the network as a whole, there has yet to be a security breach.

PROOF OF STAKE

Seeing as cryptocurrencies are decentralized and not controlled by banks, they require a way to verify transactions. Proof of stake is a popular method. Proof of stake is a consensus mechanism for cryptocurrencies. By staking their Tokens, cryptocurrency owners can check new transactions and add them to the Blockchain. This method replaces proof of work, the first cryptocurrency consensus mechanism. Proof of stake has grown in popularity as concerns about the environmental impact of crypto mining have grown. Proof of stake is critical for cryptocurrency investors. These are some examples of cryptocurrencies that use it. Owners of a cryptocurrency can stake Tokens and create their own validator nodes using the proof-of-stake model. Staking is the act of pledging your Tokens to be used for transaction verification. They are locked while you stake your Tokens, but you can unstack them if you want to trade them. When a block of transactions is ready to be processed, the proof-of stake protocol for the cryptocurrency selects a validator node to review the block. The validator verifies the accuracy of the block's transactions. If this is the case, they add the block to the Blockchain and receive cryptocurrency as a reward for their efforts.

WHY UKMETA TOKEN ?

Zero Human Factor : The human factor is not taken into consideration. The smart contract is not dependent on anyone, and there is no way to prevent the platform from functioning.

Decentralization : Instead of having managers or administrators in charge, there are only creators who are members of the community on the platform, just like everyone else.

Instant Transactions : Profits earned by other members are transferred directly into your personal wallet. There is no hoarding in the system, and all of your earnings are yours to keep.

Anonymity : Because the smart contract code is public, anyone can view the complete history of all transactions. This ensures that the conditions are pure and that the platform statistics are accurate.

CHARITY

Blockchain technology offers significant advantages for digital fundraising, revolutionizing the way charities receive contributions. It enables secure and transparent transactions on a global scale, eliminating the need for costly currency exchange commissions. Charitable organizations can now accept donations seamlessly through UKMeta Token, ensuring the utmost security and transparency for donors. These contributions will directly benefit the individuals and causes they support, thanks to the inherent trust and efficiency of blockchain technology. With reduced overhead costs and increased accessibility, blockchain-driven fundraising opens up new opportunities for philanthropy, allowing donors to make a meaningful impact on a worldwide scale while charities can focus more resources on their core missions. This innovative approach fosters a new era of trust and efficiency in charitable giving.

BONUS

You can earn money in UKMeta Token by opening new accounts with certain financial institutions and participating in the digital token-based economy supported by bonuses. These bonuses will not end here; instead, you will be able to earn from various other offers based on your investment and profit.

UKMT/USDT DEX PAIR PRICE LIVE DATA

UKMT to USDT DEX Pair: The live UKMT/USDT dex price on the BNB Smart Chain (BEP20) chain, traded on Pancake Swap v2 (BSC) is 0.00007456 USD. We update the UKMT/USDT price in real-time.

The UKMT/USDT price is up by 0.00% in the last 24 hours. The highest price achieved was 0.00007456 USD and the lowest was 0.00007456 USD. This DEX pair has a 24-hour trading volume of 84.73 USD. There were 2 buy and 1 sell transactions in the last 24 hours. Between these transactions there was a total volume of 10,000 USD that bought and 9500 USD that sold.

This page contains all the important information for this trading pair and contract address. If you wish to trade this dex pair, just click on the Trade on Pancake Swap v2 (BSC) link which takes you to the relevant Pancake Swap v2 (BSC) app page

WHAT IS DECENTRALIZATION ?

DeFi is a collective term for financial products and services that are accessible to anyone who can use Ethereum – anyone with an internet connection. With DeFi, the markets are always open and there are no centralized authorities who can block payments or deny you access to anything. Services that were previously slow and at risk of human error are automatic and safer now that they're handled by code that anyone can inspect and scrutinize. • A global, open alternative to the current financial system. • Products that let you borrow, save, invest, trade, and more. • Based on open-source technology that anyone can program with.

SMART CONTRACT

Binance Blockchain was designed to streamline communications. It ensures easy integration with a wide range of highly sophisticated programming languages. Binance is designed as a three-layered system. It consists of a core layer, storage layer, and application layer. Interestingly, each layer is optimized to perform a certain set of functions for a specific set of functionalities. It is the core layer that oversees the management of Binance smart contracts. Decentralized Finance or DeFi has emerged as the next-big thing in the world. It has the potential to deliver better results to every single if implemented correctly.

UKMETA TOKEN PARTNER – AIRDROP'S

UKMeta Token project is a Blockchain-based payment project that focuses on making reward points a commonly used as digital currency by improving the current reward points system in UK Trading, through Blockchain technology and tokenization. Although the reward points system is efficient in its current form, corporations have risks, a lack of transparency and security concerns with their centralized system for issuing and operating reward points.

UKMETA TOKEN AIRDROP GOALS:

- A fair, equal opportunity for many different people to get involved
- Facilitate activity and capture a wider audience Airdrop recipients do not need to do anything to receive the UKMETA Token. Ignore any requests for your private key.

SUPPORTING WALLET

Crypto Wallets are very similar to our mobile wallets where we store our money and do transactions from that. While in Crypto wallet we hold bitcoins and other cryptocurrencies. A Crypto wallet is a software application that allows you to store and keep track of your Bitcoins. A Crypto wallet differs from a traditional wallet in that it holds Crypto private keys

METHODS OF PAYMENT

This is a list of some of the top cryptocurrency gateways available in the market that accept UKMETA Token and alt Tokens as payment. Apart from UKMETA Token payment processing, some of the major currencies that these crypto payment processors can help merchants accept include Ethereum, Ripple, LiteToken, etc.

❖ UKMETA TOKEN (UKMT)

❖ USDT (BEP-20)

UKMETA TOKEN NETWORK

UKMeta Token Global Network – UKMeta Token an experienced organic product ecommerce company. It provides delivery service of fresh vegetables and fruits to the customers at their doorsteps by procuring all the produce from farmer’s market every morning. This makes sure that customers get fresh produce every time they order. Procuring directly from farmer’s market also reduces any intermediate costs and ensures best quality. The advantages of organic food are more based on perception than real facts. Much of this support of organic food as a healthier alternative comes from environmental groups who want to conserve the environment by avoiding pesticides and fertilizers. The producers of organic food strongly believe in the idea that organic food is superior to other types.

The organic ecommerce platform UKMeta Token Network is being strengthened for directly linking farmers with retail as well as bulk buyers. Interest in cryptocurrency is growing, and fast. With some pretty major brands, marketplaces and payment processors announcing their adoption of crypto, this digital payment method is firmly on the radars of retailers across the globe. Whilst not everyone thinks the world is ready for cryptocurrency payments, it’s certainly getting harder to ignore the impact that crypto and the Blockchain technology on which it’s built could have on ecommerce.

UKMT ECOSYSTEM OVERVIEW

The UKMT ecosystem is a comprehensive suite of blockchain-based services and products centered around its native cryptocurrency, UKMeta Token (UKMT). This ecosystem aims to provide a wide range of solutions to cryptocurrency users, including trading, payments, blockchain exploration, and more.

UKMETA TOKEN IN ONLINE GAME

UKMeta Token Gaming is an exciting online gaming platform set to be launched by the dedicated team at UKMeta Token's global network. This platform represents the cutting edge of gaming innovation, as it seamlessly integrates cryptocurrency technology into the gaming experience. These crypto games are a new breed of video games that operate on cryptocurrency networks, incorporating fully or partially decentralized ledger systems. This innovation empowers players with verifiable ownership of the virtual assets and items they acquire within these games. Online gaming, in particular, has emerged as a fertile ground for groundbreaking developments in the realm of cryptocurrency-based gaming.

Developers are continually pioneering novel ways to utilize crypto, allowing players to purchase, trade, and engage with in-game items, cosmetics, unlockable characters, and much more. This convergence of the virtual and real worlds, which we affectionately refer to as our metaverse, is now more captivating than ever. UKMeta Token Gaming offers a glimpse into the future of gaming, where players have unprecedented control over their virtual possessions, fostering a sense of ownership and value within the gaming ecosystem. As the gaming industry continues to evolve, UKMeta Token Gaming stands at the forefront, exemplifying the limitless possibilities that arise from merging cryptocurrency technology with the world of online gaming. It's a thrilling adventure that promises to redefine how we play and engage in the metaverse, making it an exciting prospect for gamers and crypto enthusiasts alike.

OUR TEAM

Safety is of utmost importance in every industry as it can significantly impact a business's well-being and performance. Companies must take proactive measures to ensure the security of their files and their employees' accounts, especially when dealing with valuable clients. To address these safety concerns comprehensively, UKMeta Token intends to hire experienced professionals well-versed in business safety practices.

By enlisting the expertise of these professionals, users can easily find solutions to their safety-related issues, relieving them of data security worries. This data encompasses company work and employee activities, often containing sensitive client information. Mishandling such data can tarnish a company's reputation. UKMeta Token offers a secure, swift, mobile-based, digital, and decentralized solution right at your fingertips.

This solution guarantees convenient access to your accounts while serving as a reliable medium for decentralized payments. Notably, it provides users with a global and competitive money transfer system capable of facilitating the exchange of both FIAT currencies and cryptocurrencies. UKMeta Token is a cryptocurrency that rewards users for various transactions in all aspects of life, making it an ideal candidate for widespread adoption in the world of cryptocurrency.

In summary, everything outlined in this whitepaper underscores UKMeta Token's status as a trustworthy and secure decentralized currency and financial ecosystem poised for a global launch.
